# TRENDnet Online Training

**Free Webinar!**

## Network Hardware: The Keys to Connectivity
## May 1, 2015 ▶ 12:00pm – 2:00pm EST

This webinar will inform the viewers on the basics of network hardware such as switches and routers. You'll learn the many alternatives that are available to connect IP devices onto LAN networks. The Internet will be explained including standard UTP cabling, AC/Ethernet, Ethernet/coax, and Wi-Fi coverage expansion. There will also be information on how dealers can set up their own separate parallel LAN networks. Join us online from the convenience of your office.

**Please register by April 24.**
